DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Gueret (4,681,127). Gueret discloses, in figs.18-21, a cosmetic compact comprising a cover elements 102, a base element 101, a toggle lever 125, a first seal 115, and a second seal 103 substantially as claimed.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Pre et al. (EP 773172). Pre discloses, in fig. 1 a cosmetic compact comprising a cover elements 5, a base element 2, a toggle lever 9, a first seal 21, and a second seal 14 substantially as claimed.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pre et al. in view of Gueret.

To the degree it can be argued that Pre et al. do not disclose the lever being connect to the base element in a recess. Gueret teach a toggle lever being connected to a base element in a recess. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the invention of Pre et al. with the toggle lever connected to the base element, as taught by Gueret, in order to pivotally engaged clamp the cover element and the base element together in the closed position.
